PROFESSIONAL SUMMARY

Full Stack Engineer with hands-on experience building MERN, React, Node.js and Laravel-based web applications. Experience spans production web/mobile features, reusable React components, REST APIs, MongoDB optimization, authentication, caching and AI-enabled applications. Delivered measurable improvements including ~40% lower MongoDB query latency and ~25% faster frontend load times. Comfortable working across frontend, backend, database design and deployment, with a focus on maintainable, user-facing software.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, Tailwind CSS, Framer Motion, HTML5, CSS3, Vue 3, Inertia.js

Backend: Node.js, Express.js, Laravel, PHP, REST API Design, JWT, OAuth 2.0, RBAC, Middleware, Session Management

Database / Caching: MongoDB, Mongoose, MySQL, Schema Design, Indexing, Query Optimization, Redis, Caching, Queues

AI / Integration: Grok API (xAI), RAG, LLM-powered features, API integration

Tools / Deployment: Git, GitHub, Postman, APIdog, Vercel, Cloudinary, Agile / Scrum

PROFESSIONAL EXPERIENCE

Junior Software Developer | Zupper Commerce Pvt. Ltd. Oct 2024 – Dec 2025 · Bengaluru

- Worked across design, development and maintenance of web/mobile application features, taking ownership of assigned tasks and collaborating with the team.
- Built reusable React components and shared UI patterns, helping reduce duplicate frontend development effort and improve consistency.
- Integrated REST APIs for product, user and order workflows, handling loading, error and edge-case states in the frontend.
- Improved frontend performance through memoization, lazy loading/code splitting and reduction of unnecessary React re-renders.
- Contributed within Agile sprint workflows using Git branching, pull requests and production deployment practices.

React Developer Intern | Jozzby Bazar Sep 2023 – Jan 2024

- Built responsive React interfaces for mobile, tablet and desktop breakpoints using reusable component patterns.
- Integrated and validated REST API contracts, handling null states, API errors and asynchronous edge cases.
- Contributed to modular frontend architecture with consistent component and prop interfaces.

SELECTED PROJECTS

Yeshu Tours & Travels — Production Travel Booking Platform | Astro, Tailwind CSS, Express.js, MongoDB, Redis, Next.js/React, Cloudinary, Vercel

- Built a mobile-first travel booking platform with a customer-facing Astro frontend, Express/MongoDB backend, Redis-backed services and a React/Next admin panel.
- Implemented booking workflows, API integrations, image/media handling and admin operations with a focus on production readiness and performance.
- Structured the platform for maintainability across frontend, backend and admin applications, with responsive UI and deployment through Vercel.

RMC ERP — Ready-Mix Concrete Enterprise ERP | Laravel, PHP, Vue 3, Inertia.js, PrimeVue, MySQL

- Developed and maintained ERP workflows covering quotations, customer POs, batching, dispatch, pump deployments, quality-control workflows, inventory and accounting-related operations.
- Worked across Laravel APIs, database schemas, role-based access, dropdown/helper logic and Vue/Inertia interfaces for operational users.
- Implemented business rules for concrete mix designs, pump rates, QC tests and production/dispatch workflows while improving maintainability of shared ERP components.

Cerebrum — AI-Powered Note-Taking Platform | Node.js, React, Grok API (xAI), RAG, OAuth 2.0, MongoDB, Vercel

- Integrated Grok API for note summarization, writing suggestions and automatic smart tags, eliminating manual tagging in the workflow.
- Implemented a retrieval-augmented generation pipeline to surface relevant notes during AI-assisted queries.
- Built debounced auto-save, smart search, responsive dark-mode UI and secure Google OAuth 2.0 authentication.

Multi-Vendor E-Commerce Platform | Node.js, React, Redux Toolkit, RBAC, JWT, MongoDB

- Designed role-based access for Admin, Vendor and Customer with route-level protection middleware.
- Implemented JWT authentication with token expiry/refresh handling and protected vendor APIs.
- Built Redux Toolkit state management for cart, authentication and product inventory across multi-vendor storefronts.

EDUCATION

Master of Computer Applications (MCA) | REVA University | 2024 – 2025 | CGPA: 8.2 / 10

PUBLICATION

Decentralized Content Creation and Distribution in Web 3.0 | Postgraduate Research Paper | 2025 — Analyzed decentralized content platforms, smart-contract governance and DAO incentive models, including scalability trade-offs.
